FLAT DRIVE TECHNOLOGY

Perfectly flat spanner head surfaces allow for maximum contact between the spanner and the bolt or nut, maximising grip and enhancing applied torque.

**SP FLAT DRIVE
SPANNER HEAD**

**REGULAR
CONTACT AREA**

MAXIMUM CONTACT

Spanner heads make contact on the flat sides of the fastener head, not the points.

QUAD DRIVE OPEN END

SP Tools patented **QUAD DRIVE** open end offers 4 times the gripping power of a standard ROE spanner by wrapping around the fastener and maximising the contact on the flat sides of the fastener head, not the points.

DUAL FLAT DRIVE RING END

SP Tools **RING END** spanners feature dual flat drive ring ends, making them the perfect spanner for getting to and loosening those tricky, hard to reach, often worn fasteners by increasing the contact area with the nut or bolt head.

GEAR DRIVE RING END

SP Tools patented **GEAR DRIVE** spanners are precisely machined with deeper gears for greater torque loading and reliability with 72 teeth that only require 5° of space per turn.
